15-400 Project Milestones: Using Just in Time Compilation to Implement an In-Memory Database Key Comparator

Abigale Kim

March 5, 2021

1   Major Changes

There have been no major changes in the implementation of my project proposal.

2   Accomplishments

I'm also taking 15-745 (Optimizing Compilers) this semester in order to help with my research project–that is going well. I've done the basics of implemnting a basic key comparator in TPL, which puts me about 2 weeks behind.

3   Meeting Your Milestone

Have done the first milestone, but am not near the second.

4   Surprises

Have eliminated some of the work regarding TAing, but have to complete prior research work on a project I was working on since freshman year.

5   Revisions to Original Milestones

No change to original milestones (yet), but am concerned I won't finish.

6   Resources Needed

I am set with both software and hardware.
